Provider-to-provider subspecialty consults:

New, improved process

The goal of the physician access line is to connect community providers with subspecialists for consults (discuss a treatment plan, ask for advice, determine if care can be managed in the pediatrician's office vs. a referral, etc.). We recently adapted our PAL process to meet the growing need for timely access to provider-to-provider consults.

Need to speak to one of our specialists?

- Call 804-628-1PAL (1725)
- Select 1 for pediatric consults
- Calls are now answered by a seasoned pediatric triage nurse instead of a call center representative

If the triage nurse is unable to support your need, they will connect you with a specialist. In order to maximize communications while also ensuring the best patient experience, we'll expedite calls to providers based off of the urgency of the need for a consult (as soon as possible, same business day (if call is received before noon) or within the next 1-2 business days).

Request a consult online at:
chrichmond.org/ConsultRequest

We look forward to partnering with you to care for your patients! Please share any feedback on this new consult process with your outreach representative.
